# Superior scanning experience with Xcart

Make your scanning setup look professional and your every-day work easier with a cart that is specially designed for your intraoral scanner.

Xcart can be used with any intraoral scanner that uses a PC or laptop (Medit i500, 3Shape TRIOS etc.)

Modern Design

Xcart is an aesthetic and practical solution for your intraoral scanner setup. It is designed to ensure that only power and intraoral camera cables are visible, hiding all other cables. Its clean lines combined with quality materials make this cart stand out in a positive way in your dental office.

Open System

To grant you more flexibility Xcart can be used with a desktop or laptop computer without the need to buy any additional add-ons. This gives you more options in deciding which computer would be most suitable for your needs, and makes it easier to upgrade your computer later on.

Product Specifications

Base Size: 83 x 55 x 40 cm

Work Surface Size: 55 x 40 cm

PC Cabinet Size: 48 x 28 cm

Cart weight: 25 kg (excluding PC, monitor and UPS)
